

# PCI-DSS Compliance Report

Target System: paul  
IP Address: 216.58.223.206  
Scan Date: 2026-06-01 22:55:08 UTC

## Compliance Summary

| Total Checks | Passed | Failed | Warnings | Compliance Score |
|--------------|--------|--------|----------|------------------|
| 23           | 13     | 5      | 5        | 56%              |

## Detailed Findings

| Requirement   | Description                                          | Status  | Risk     | Evidence                                                    |
|---------------|------------------------------------------------------|---------|----------|-------------------------------------------------------------|
| PCI-DSS 1.2   | Port 23 (Telnet) is closed                           | PASS    | Low      | Port 23 did not respond on 216.58.223.206                   |
| PCI-DSS 1.2   | Dangerous port 21 (FTP) is OPEN                      | FAIL    | High     | Port 21 responded on 216.58.223.206                         |
| PCI-DSS 1.2   | Port 69 (TFTP) is closed                             | PASS    | Low      | Port 69 did not respond on 216.58.223.206                   |
| PCI-DSS 1.2   | Port 161 (SNMP) is closed                            | PASS    | Low      | Port 161 did not respond on 216.58.223.206                  |
| PCI-DSS 1.2   | Port 512 (rexec) is closed                           | PASS    | Low      | Port 512 did not respond on 216.58.223.206                  |
| PCI-DSS 1.2   | Port 513 (rlogin) is closed                          | PASS    | Low      | Port 513 did not respond on 216.58.223.206                  |
| PCI-DSS 2.1   | SSH not exposed on port 22                           | PASS    | Low      | Port 22 is closed                                           |
| PCI-DSS 2.1   | HTTP service detected on port 80                     | WARNING | Medium   | Port 80 open — verify default credentials are changed       |
| PCI-DSS 2.1   | MySQL not exposed on port 3306                       | PASS    | Low      | Port 3306 is closed                                         |
| PCI-DSS 2.1   | PostgreSQL not exposed on port 5432                  | PASS    | Low      | Port 5432 is closed                                         |
| PCI-DSS 2.1   | MongoDB not exposed on port 27017                    | PASS    | Low      | Port 27017 is closed                                        |
| PCI-DSS 3.2   | Potential cardholder data files found                | FAIL    | Critical | Suspicious files: /home/akhibs/.local/share/Zeal/Zeal/docse |
| PCI-DSS 4.1   | HTTPS/TLS could not be verified                      | WARNING | Medium   | [SSL: CERTIFICATE_VERIFY_FAILED] certificate verify fai     |
| PCI-DSS 5.1   | No anti-malware tools found on system                | FAIL    | High     | Checked for clamav, rkhunter, chkrootkit — none found       |
| PCI-DSS 6.3   | System is fully up to date                           | PASS    | Low      | No pending updates found via apt-get                        |
| PCI-DSS 7.2   | File permissions OK: /etc/passwd                     | PASS    | Low      | /etc/passwd has permissions 644                             |
| PCI-DSS 7.2   | File permissions OK: /etc/shadow                     | PASS    | Low      | /etc/shadow has permissions 640                             |
| PCI-DSS 7.2   | File not found: /etc/ssh/sshd_config                 | WARNING | Medium   | /etc/ssh/sshd_config does not exist on this system          |
| PCI-DSS 8.3.9 | Password expiry set to 99999 days                    | FAIL    | Medium   | PASS_MAX_DAYS=99999 in /etc/login.defs                      |
| PCI-DSS 9.1   | Physical access controls require manual verification | WARNING | Medium   | Verify: locked server rooms, CCTV, visitor logs, badge acce |

|              |                                       |         |        |                                                        |
|--------------|---------------------------------------|---------|--------|--------------------------------------------------------|
| PCI-DSS 10.2 | Audit log found: /var/log/auth.log    | PASS    | Low    | Log file exists at /var/log/auth.log                   |
| PCI-DSS 11.3 | No vulnerability scanning tools found | FAIL    | High   | Checked for nmap, nikto, openvas, lynis — none found   |
| PCI-DSS 12.1 | No security policy document found     | WARNING | Medium | No policy file found — ensure documented policy exists |
